

# Aptamil® ProExpert Pepti

EXTENSIVELY HYDROLYZED FORMULA

- Aptamil ProExpert Pepti is a specialized formula for use under medical supervision.
- Aptamil ProExpert Pepti is a whey-based **extensively hydrolyzed formula** for the dietary management of cow milk allergy with galacto- and fructo-oligosaccharides (GOS/FOS).
- Aptamil ProExpert Pepti is a nutritionally complete hypoallergenic formula, suitable from birth. Suitable as part of a mixed diet in babies over the age of 6 months.

Product	Product code	UPC Code
Aptamil ProExpert Pepti (Powder) 400 g Can	165081	7891025119999
Aptamil ProExpert Pepti (Powder) 400 g x 12 Case	165081	17891025119996

**Indications :** For enteral use only. For the dietary management of cow milk allergy.

**Precautions :** Must be used under medical supervision, after full consideration of all feeding options, including breastfeeding. Suitable as part of a mixed diet in babies over the age of 6 months. Due to the special formulation of the feed, there may be some separation of prepared feeds on standing. Shake well before use.

**Preparation and directions for usage :** Important: Formula should be prepared immediately prior to feeding. Do not boil formula and do not use a microwave to prepare or warm formula. Preparation: All Aptamil products carry preparation instructions. Please see label instructions provided for further information. Tins should be stored in a cool, dry place; do not refrigerate, and use contents within four weeks of opening.

## BECAUSE POWDERED MILKS ARE NOT STERILE, FAILURE TO FOLLOW INSTRUCTIONS MAY MAKE YOUR BABY ILL

1. Wash hands and sterilize all utensils according to manufacturer's instructions.
2. Boil 1 litre of fresh water. Cool water for 30 mins and no longer. Measure the required amount of water (refer to feeding guide) into a sterilized bottle. Be careful of scalding. Do not use artificially softened or repeatedly boiled water.
3. Using the scoop provided, level off the powder with the back of a clean dry knife. Do not press/heap the powder.
4. Add the correct measure of powder to the water. Place the sterilized teat and cap on the bottle and shake vertically and vigorously for 25 seconds to dissolve the powder.
5. Cool under running tap. Check temperature of feed. Feed immediately. Recommended feed concentration: One level scoop (as provided in the can) provides approximately 4.5 g of powder. Add one level scoop of powder to every fluid ounce (30ml) of water to yield the recommended feed concentration.

**Ingredients :** Extensively Hydrolysed whey protein, Maltodextrin, Vegetable oils (Palm oil, Coconut oil, Rapeseed oil, High oleic sunflower oil, Sunflower oil), Fibers (Galacto-oligosaccharides and Fructo-oligosaccharides), Calcium phosphate, Potassium chloride, Fish oil, Oil from *Mortierella alpina*, Calcium Carbonate, Choline chloride, Ascorbic acid, Taurine, Sodium ascorbate, ferrous sulphate, Inositol, Zinc sulphate, Nucleotides (Uridine, Cytidine, Adenosine, Inosine, Guanosine), DL-alpha tocopheril acetate, L-Carnitine, Nicotinamide, Pantothenic acid, Biotin, Copper sulphate, Folic acid, Retinil Palmitate, DL-Alpha tocopherol, Cyanocobalamin, Thiamin Chloride, Riboflavin, Cholecalciferol, pyridoxine hydrochloride, Manganese sulphate, Potassium iodide, phytomenadione, Sodium selenite and Emulsifiers (citric acid esters of mono and diglycerides of fatty acids)

**Contains: Lactose and Fish Oil.**

**Gluten Free.**

**Shelf life** : 18 months. Best before date: see base of can.

**Storage** : Store in a cool, dry place. Do not refrigerate. Once opened, use within four weeks. Always replace container lid after use.

## NUTRITIONAL FACTS
