

PACK SIZE AND MINOR NUTRITION CHANGES TO CERTAIN NUTRICIA METABOLIC PRODUCTS

Effective November 2024

Dear Metabolic Community,

Service and providing best-in-class products to the metabolic community is our top priority as we strive to help people live longer, healthier lives.

With this in mind, we are pleased to share that we are changing the production of **PhenylAde®**, **GlutarAde®** and **Complex MSD®** products to better serve you and maintain reliable supply. This will allow us to maintain our commitment to the metabolic community.

These changes will result in some modifications and additional benefits to our products, such as:

Modifications:

- Product code and pack size changes
- Changes in ingredients, such as alternative sources of vitamins/minerals and Docosahexaenoic Acid (DHA)
- Slight, clinically insignificant changes to some of the nutrition information

Positive Changes:

- Removal of plastic scoops and introduction of recyclable cans for greater environmental sustainability. Household measurement equivalents will be provided on the can
- No more colors from artificial sources
- Addition of soy fiber to some products
